

FULL STACK DEVELOPER

Overview:

We are looking for an experienced mid-to-senior level Full Stack Developer with a positive attitude, result-oriented mentality and strong technical skills to develop technology solutions for our U.S. based clients.

Key Responsibilities:

- Developer responsibilities include building client application solution(s) from concept all the way to completion from the bottom up;
- Design of web-based, desktop or mobile solutions, with data-driven capabilities;
- Work with customers and design team to gather and interpret requirements into solutions;
- Create and integrate data from various back-end services and databases;
- Write well designed, testable, efficient code by using best software development practices;
- Pitch ideas and design concepts in a group environment and synthesize/interpret feedback from multiple stakeholders.

Qualifications:

- 3+ years of experience of database development and developing software;
- Understanding of English language is a must;
- Excellent hands-on knowledge on one of programming languages and technologies (e.g. JavaScript, Java, Java Applets, PL/SQL, XML/XSLT, HTML/DHTML, Web Services, Linux, CSS, jQuery, AJAX, JSON, JSONP);
- Ability to prototype complex web, desktop, or mobile applications;
- Strong database design and development skills (relational databases and SQL);
- Experience in both front-end and back-end development preferred (but not required);
- Capable of adapting quickly to new technologies and related requests;
- Strong organizational and project management skills.
- Excellent verbal communication skills.
- Good analytical and problem solving skills. Attention to details.

Educational Experience:

- Bachelor's Degree in Computer Science/Programming a plus (Not required)

We offer:

- Amazing Company Culture | Competitive Market Pay | Hybrid/Remote Work |
Top Medical Insurance & Coverage | Training Programs | Growth Opportunities
