Section I. Instructions to Offerors

I.1. Introduction

Chemonics, the Buyer, acting on behalf of the U.S. Agency for International Development (USAID) and the Kosovo e-Governance Activity (KeG) , under contract number #7200AA21D00015/72016723F00001 is soliciting offers from companies and organizations to submit proposals to participate with KeG to carry out a *IT Spending Study and Two Feasibility Studies on Developing In-House vs. Outsourcing IT Skills*.

The Kosovo e-Governance Activity (KeG) aims to improve the Government of Kosovo’s digital service delivery and management of digital government systems by clarifying institutional roles and processes, strengthening institutional capacity to deliver services, and engaging civil society and the private sector. KeG will accelerate transformation into an agile digital government, which ensures that Kosovans receive high quality, efficient and accessible government services. KeG focuses on the following three program objectives:

1. Institutional roles and governance processes are clear, actionable, and implemented.
2. Key institutions have the technical expertise and program management skills to develop, manage, and deliver digital government platforms and services.
3. External feedback and oversight mechanisms on digital priorities and service delivery are established and used.

More specifically to this Scope of Work, KeG is tasked with improving GoK’s ability to access and retain qualified IT professionals. With regard to enhancing the technical expertise, program management skills, and IT service delivery capabilities of key institutions, there is a need to assess optimal strategies for IT resource allocation and management. This involves conducting an *IT Spending Study and Two Feasibility Studies on Developing In-House vs. Outsourcing IT Skills* to determine the most effective approach between developing internal IT capacities and outsourcing IT services and skills.

The cost proposal is used to determine which proposals represent the best value and serves as a basis of negotiation before award of a subcontract.

The price of the subcontract to be awarded will be an all-inclusive fixed price. No profit, fees, taxes, or additional costs can be added after award. Nevertheless, for the purpose of the proposal, offerors must provide a detailed budget showing major line items, e.g. salaries, allowances, travel costs, other direct costs, indirect rates, etc., as well as individual line items, e.g. salaries or rates for individuals, different types of allowances, rent, utilities, insurance, etc. Offers must show unit prices, quantities, and total price. All items, services, etc. must be clearly labeled and included in the total offered price. All cost information must be expressed in Euro. See Annex 2 for a sample cost structure.

Because Kosovo e-Governance Activity is a USAID funded project and is implemented under a bilateral agreement between the Kosovo and the U.S. Government, offerors must not include VAT and customs duties in their cost proposal.

The comprehensive cost proposal shall also include a budget narrative that explains the basis for the estimate of every cost element or line item. Supporting information must be provided in sufficient detail to allow for a complete analysis of each cost element or line item. Chemonics reserves the right to request additional cost information if the evaluation committee has concerns of the reasonableness, realism, or completeness of an offeror's proposed cost.

If it is an offeror's regular practice to budget indirect rates, e.g. overhead, fringe, G&A, administrative, or other rate. Offerors must explain the rates and the rates' base of application in the budget narrative. Chemonics reserves the right to request additional information to substantiate an Offeror's indirect rates.

Cost proposals should include a list of each deliverable included in the technical proposal and an inventory or costs specific to that deliverable.

Under no circumstances may cost information be included in the technical proposal. No cost information or any prices, whether for deliverables or line items, may be included in the technical proposal. Cost information must only be shown in the cost proposal.

I.8 Evaluation and Basis for Award

An award will be made to the offeror whose proposal is determined to be responsive to this solicitation document, meets the eligibility criteria stated in this RFP, meets the technical, management/personnel, and entity capacity requirements, and is determined to represent the best value to Chemonics.

This RFP will use the tradeoff process to determine best value as set forth in FAR 15.101-1. That means that each proposal will be evaluated and scored against the evaluation criteria and evaluation sub-criteria, which are stated in the table below. Chemonics will award a subcontract to the offeror whose proposal represents the best value to Chemonics and the KeG project. Chemonics may award to a higher priced offeror if a determination is made that the higher technical evaluation of that offeror merits the additional cost/price.

Evaluation points will not be awarded for cost, but for overall evaluation purposes of this RFP, technical evaluation factors other than cost, when combined, are considered significantly more important than cost factors. Cost will primarily be evaluated for realism and reasonableness. If technical scores are determined to be nearly equal, cost will become the determining factor.

In evaluating proposals, Chemonics will use the following evaluation criteria and sub-criteria:

Section II Background, Scope of Work, Deliverables, and Deliverables Schedule

II.1. Background

The analysis for in-house versus outsourced IT skills and services requires precise cost data. Understanding GoK's overall IT spending is challenging; although visible in dedicated IT projects, significant funds may intertwine as costs unrelated to IT projects. An in-depth IT spending analysis, disaggregated by factors such as skills, services, and institutions, IT infrastructure/hardware/software and other relevant factors, requires historical data, and insights from interviews with key staff.

The objective is to gain insights into the most effective approaches for IT skills development and to understand the GoK's decision-making process regarding the development of in-house skills versus outsourcing. Outsourcing skills and services could provide a good alternative to addressing hiring difficulties GoK faces with IT skills. The activity will generate two feasibility studies for two government institutions, comparing in-house skills development with outsourcing IT services. Additionally, it will assist AIS to develop evaluation procedures for determining IT skills development or outsourcing decisions.

This activity aims to engage a local NGO (think tank) or a company with a proven track record in policy analysis - to leverage its experience and develop additional capacity and expertise in monitoring GoK IT expenditures. Engaging CSO and private sector is designed to enhance the government's ability to track IT expenditure and monitor trends in IT skills development and outsourcing, ensuring continuity and long-term effectiveness in managing IT resources, whether outsourced or developed in-house.

II.2. Scope of Work

The scope of work encompasses conducting an in-depth analysis to compare in-house versus outsourced IT skills and services within the Government of Kosovo (GoK) context. The analysis will focus on gathering precise cost data related to IT spending and understanding the decision-making process regarding the development of in-house skills versus outsourcing.

The specific activities outlined below:

1. Write Inception Report

- Conduct a project kick-off meeting with project stakeholders to review and confirm project goals, scope, and requirements.
- Develop an inception report that includes an introduction, project goals, scope, requirements, constraints, risks, project plan, and progress monitoring.
- Provide an overview of the project and its purpose, outline high-level goals and objectives, define the scope of the project, outline of the methodology and approach to completing the project, identify any constraints that may impact the project, describe the risk management methodology and potential risks, outline the high-level plan for the project, and describe the regular progress monitoring methodology and meetings.

2. Conduct an IT Spending Study:

- Gather historical data on IT spending within the GoK, disaggregated by factors such as skills, institutions, services, IT infrastructure/hardware/software, and other relevant parameters.
- Utilize insights from gathered data, and interviews with key staff to comprehensively analyze IT spending patterns and trends.

- Provide a detailed report outlining the findings of the IT Spending Study.
 - Identify and propose two government institutions on criteria agreed upon by Activity, for whom to conduct feasibility studies on developing in-house vs outsourcing of IT skills.
3. Conduct **Two Feasibility Studies**:
- Compare in-house skills development with outsourcing IT skills for two government institutions.
 - Analyze current and planned IT service offerings, inclusive of current organization structure and capacities vs planned.
 - Analyze the potential benefits, challenges, and cost implications of both in-house and outsourced approaches.
 - Present recommendations based on the feasibility studies for each institution.
4. Develop **Evaluation Procedure** for determining in-house development vs outsourcing IT skills decisions, in collaboration with the Agency for Information Society (AIS).
Incorporate the methodology used to produce two feasibility studies in Deliverable No. 3 into a formal process, in the form of an AIS regulation to guide decisions on in-house development versus outsourcing of IT skills. This should consider factors such as specific IT needs, resource availability, cost-effectiveness, performance impact, and desired control level. The evaluation procedure will provide a systematic approach to decision-making, including data analysis and ongoing monitoring.
5. Draft **Implementation Recommendations** for Outsourcing IT Skills, in Accordance with Regulation from Deliverable No. 4
Recommendations outlining the implementation process for outsourcing IT skills development, based on the regulation/procedure developed in Deliverable No. 4. These recommendations will cover various aspects, including the types of contracts to consider, procurement procedures, and the overall approach to outsourcing. The objective is to provide clear guidance on how the institution should proceed if it determines that outsourcing is the most effective strategy for skills development, ensuring alignment with the regulation outlined in Deliverable No. 4.

II.3. Deliverables

The successful offeror shall deliver to Chemonics the following deliverables, in accordance with the schedule set forth in II.4 below.

Deliverable No. 1: Inception Report

The Inception Report will include an introduction, project goals, scope, requirements, constraints, risks, project plan, and progress monitoring. This report provides an overview of the project and its purpose, outlines high-level goals and objectives, defines the scope of the project, approach and methodology to be used, identifies any constraints that may impact the project, describes the risk management methodology and potential risks, outlines the high-level plan for the project, and describes the regular progress monitoring methodology and meetings.

Deliverable No. 2: IT Spending Study

The IT Spending Study should analyze budget planning, budget realization (e.g. spent vs budgeted), and other related information for IT expenditures across various categories such as institutions or budget organizations, skills, services, infrastructure, hardware, and software. The report should encompass all IT

related spending over the agreed past period of typically 5 years. This involves extracting and analyzing data from planned budgets and payment registers and presenting breakdowns of spending categories, totals, and trends.

Additionally, the analysis will focus on a representative sample of Government of Kosovo institutions, such as the Agency for Information Society (AIS), Ministry of Finance, Treasury, Tax Administration, Ministry of Economy, and other relevant entities, to provide an in-depth examination, augmenting initial data findings from payment registers with insights from interviews with key personnel from the representative institutions sample, with an aim to reveal patterns and trends, and to extract key findings to assess the cost-effectiveness of IT spending in the GoK, thus aiding decision-making and resource optimization.

Deliverable No. 3: Two Feasibility Studies with two GoK institutions on developing internal vs. outsourcing IT skills.

The deliverable entails conducting two feasibility studies with selected GoK institutions to assess the viability of developing internal IT skills versus outsourcing. The selection of the institutions will consider factors such as institution size, IT operational complexity, and data availability. Consultations with key stakeholders, including the Digital Transformation Unit (DTU), the Ministry of Finance, and other relevant entities, will inform the selection process.

The feasibility studies will utilize a mixed-methods design, combining quantitative and qualitative data collection and analysis methodologies. This approach will enable a comprehensive assessment of the potential benefits, challenges, and implications associated with both internal skills development and outsourcing of IT services within the selected institutions. The studies aim to provide actionable insights and recommendations to inform decision-making regarding IT skills development strategies in the GoK, aligning with organizational goals and objectives.

Deliverable No. 4: Draft an Evaluation Procedure for determining in-house development vs outsourcing IT skills decisions.

This deliverable involves drafting an evaluation procedure, in the form of a regulation to be enacted by AIS, to steer the AIS in making decisions regarding in-house development versus outsourcing of IT skills. This deliverable is an extension, formalizing the approach and the methodology used in Deliverable No. 3 into a written procedure for future reference and implementation. The procedure will be designed to provide a clear and systematic process and framework for evaluating various factors influencing these decisions, ensuring alignment with organizational goals and objectives, and supporting the organization in optimizing its IT resources and capabilities to achieve its mission and objectives.

The Evaluation Procedure will consider factors such as:

- The specific IT skills required by AIS to fulfill its objectives.
- The availability of internal resources and expertise for developing these skills in-house.
- The cost-effectiveness and efficiency of outsourcing IT skills versus developing them internally.
- The potential impact on organizational performance, flexibility, and innovation.
- The level of control and oversight desired by AIS over IT skill development and implementation.

The procedure will outline steps for assessing each factor, including data collection, analysis, and decision-making criteria. It will also include mechanisms for ongoing monitoring and review to ensure the effectiveness of the chosen approach over time.

Deliverable No. 5: Draft Implementation Recommendations for Outsourcing IT Skills, in Accordance with Procedure from Deliverable No. 4

This deliverable entails drafting implementation recommendations for outsourcing IT skills development, aligning with the regulation/procedure established in Deliverable No. 4. The recommendations will encompass various aspects such as:

- Types of contracts to consider: Provide guidance on the different contractual arrangements suitable for outsourcing IT skills, considering factors such as project duration, complexity, and desired level of control.
- Procurement procedures: Outline the procurement processes to be followed when outsourcing IT skills, for example: best price, best value, etc. and including vendor selection criteria, bidding processes, and contract negotiation strategies.

The objective is to provide the institution with clear and actionable guidance on how to implement outsourcing as a strategy for skills development, ensuring coherence with the procurement law and the regulatory framework established in Deliverable No. 4.

Deliverable No. 6: Final written report

This deliverable entails final written report of no more than 5 pages that describes but not limited to the following:

- The purpose of the consultancy.
- Work undertaken.
- Progress made.
- Issues and/or problems encountered.
- Expected follow-on interventions, as well as actions to be performed by counterparts.
- List of stakeholders met.

General Requirements - overarching requirements for all deliverables:

- Work with relevant GoK institutions, IT professionals, and external experts.
- Conduct surveys among IT personnel and managers in the selected institutions, interview key informants, and review documents related to their IT projects and practices.
- Develop comprehensive reports consisting of an executive summary, background information, methodology, findings, conclusions, and recommendations. Structured in a logical flow, visualizations such as graphs, charts, and tables will be used to illustrate key points.
- Gather and incorporate feedback from various stakeholders and incorporate it into final deliverables.

Pursuant to the requirements of FAR 52.204-10, Chemonics is required to report information regarding its award of subcontracts and sub-task orders under indefinite delivery/indefinite quantity subcontracts to the Federal Funding Accountability and Transparency Act Subaward Reporting System (FSRS). This information will be made publicly available at <http://www.USASpending.gov>.

In addition to contractual remedies, Chemonics may make the Subcontractor's failure to comply with the reporting requirements a part of the Subcontractor's performance information record.

Annex 2 Guide to Creating a Financial Proposal for a Fixed Price Subcontract

The purpose of this annex is to guide offerors in creating a budget for their cost proposal. Because the subcontract will be funded under a United States government-funded project, it is important that all offerors' budgets conform to this standard format. It is thus strongly recommended that offerors follow the steps described below.

Under no circumstances may cost information be included in the technical proposal. No cost information or any prices, whether for deliverables or line items, may be included in the technical proposal. Cost information must only be shown in the cost proposal.

Step 1: Design the technical proposal. Offerors should examine the market for the proposed activity and realistically assess how they can meet the needs as described in this RFP, specifically in section II. Offerors should present and describe this assessment in their technical proposals.

Step 2: Determine the basic costs associated with each deliverable. Offerors should consider best estimate of the costs associated with each deliverable, which should include labor and all non-labor costs, e.g. other direct costs, such as fringe, allowances, travel and transport, etc.

Step 3: Create a budget for the cost proposal. Each offeror must create a budget using a spreadsheet program compatible with MS Excel. The budget period should follow the technical proposal period. A sample budget is shown on the following page. All items and services must be clearly labeled and include the total offered price. The detailed budget must show major line items, including, for example:

1. Salaries
2. Indirect costs
3. Any other costs applicable to the work
4. DBA – see clause I. 11

All cost information must be expressed in € (Euros).

Step 4: Write Budget Narrative. Chemonics reserves the right to request additional cost information if the evaluation committee has concerns of the reasonableness, realism, or completeness of an offeror's proposed cost.

If it is an offeror's regular practice to budget indirect rates, e.g. overhead, fringe, G&A, administrative, or other rate, Offerors must explain the rates and the rates' base of application in the budget narrative. Chemonics reserves the right to request additional information to substantiate an Offeror's indirect rates.

Cost proposals must be sent password -protect in Excel. Send cost proposal file along with your other proposal documents. Send the budget file password **ONLY** in a separate email to aspahiu@eGovKosovo.org

INSTRUCTION to password-protect file in Excel:

Annex 4 [Use only if the anticipated value of the subcontract is \$30,000 or more]
UEI and SAM Registration Guidance

What is an UEI Number?

The Unique Entity Identifier, or the UEI, is the official name of the “new, non-proprietary identifier” that will replace the DUNS number. The UEI will be requested in, and assigned by, the System for Award Management (SAM.gov). Businesses and organizations who receive funding from the US government will have to use a Unique Entity Identifier (UEI) created in SAM.gov. The UEI number helps the USG to identify companies.

Why am I being requested to obtain a UEI number?

U.S. law – in particular the Federal Funding Accountability and Transparency Act of 2006 (Pub.L. 109-282), as amended by section 6202 of the Government Funding Transparency Act of 2008 (Pub.L. 110-252) - make it a requirement for all entities doing business with the U.S. Government to be registered, currently through the System for Award Management, a single, free, publicly- searchable website that includes information on each federal award. As part of this reporting requirement, prime contractors such as Chemonics must report information on qualifying subawards as outlined in FAR 52.204-10 and 2CFR Part 170. Chemonics is required to report subcontracts with an award valued at greater than or equal to \$30,000 under a prime contract and subawards under prime grants or prime cooperative agreements obligating funds of \$25,000 or more, whether U.S. or locally based. Because the U.S. Government uses UEI numbers to uniquely identify businesses and organizations, Chemonics is required to enter subaward data with a corresponding UEI number.

Is there a charge for obtaining a UEI number?

No. Obtaining a UEI number is absolutely free for all entities doing business with the Federal government. This includes current and prospective contractors, grantees, and loan recipients.

How do I obtain a UEI number?

UEI numbers can be obtained online at SAM.gov.

What information will I need to obtain a UEI number?

To request a UEI number, you will need to provide the following information:

- Legal name and structure
- Tradestyle, Doing Business As (DBA), or other name by which your organization is commonly recognized
- Physical address, city, state and Zip Code
- Mailing address (if separate)
- Telephone number
- Contact name
- Number of employees at your location
- Description of operations and associated code (SIC code found at <https://www.osha.gov/pls/imis/sicsearch.html>)
- Annual sales and revenue information
- Headquarters name and address (if there is a reporting relationship to a parent corporate entity)

How long does it take to obtain a UEI number?

The UEI number is issued immediately upon completion of the request process.

Are there exemptions to the UEI number requirement?

There may be exemptions under specific prime contracts, based on an organization's previous fiscal year income when selected for a subcontract award, or Chemonics may agree that registration is impractical in certain situations. Organizations may discuss these options with the Chemonics representative.

What is CCR/SAM?

Central Contractor Registration (CCR)—which collected, validated, stored and disseminated data in support of agency acquisition and award missions—was consolidated with other federal systems into the System for Award Management (SAM). SAM is an official, free, U.S. government-operated website. There is NO charge to register or maintain your entity registration record in SAM.

When should I register in SAM?

While registration in SAM is not required for organizations receiving a grant under contract, subcontract or cooperative agreement from Chemonics, Chemonics requests that partners register in SAM if the organization meets the following criteria requiring executive compensation reporting in accordance with the FFATA regulations referenced above. SAM.gov registration allows an organization to directly report information and manage their organizational data instead of providing it to Chemonics. Reporting on executive compensation for the five highest paid executives is required for a qualifying subaward if in your business or organization's preceding completed fiscal year, your business or organization (the legal entity to which the UEI number belongs):

- (1) received 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; **and**
- (2) \$25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; **and**,
- (3) The public have **does not** have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI number it provided belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the US Internal Revenue Code of 1986.

If your organization meets the criteria to report executive compensation, the following sections of this document outline the benefits of and process for registration in SAM.gov. Registration may be initiated at <https://www.sam.gov>. There is NO fee to register for this site.

Why should I register in SAM?

Chemonics recommends that partners register in SAM to facilitate their management of organizational data and certifications related to any U.S. federal funding, including required executive compensation reporting. Executive compensation reporting for the five highest paid executives is required in connection with the reporting of a qualifying subaward if:

- a. In your business or organization's preceding completed fiscal year, your business or organization (the legal entity to which the UEI number belongs) received (1) 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative

agreements; and (2) \$25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and,

- b. The public have does not have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI number it provided belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986.

What benefits do I receive from registering in SAM?

By registering in SAM, you gain the ability to bid on federal government contracts. Your registration does not guarantee your winning a government contract or increasing your level of business. Registration is simply a prerequisite before bidding on a contract. SAM also provides a central storage location for the registrant to supply its information, rather than with each federal agency or prime contractor separately. When information about your business changes, you only need to document the change in one place for every federal government agency to have the most up-to-date information.

How do I register in SAM?

Follow the step-by-step guidance for registering in SAM for assistance awards (under grants/cooperative agreements) at: https://www.fsd.gov/sys_attachment.do?sys_id=d4d157741ba3c5103565ed3ce54bcb0

Follow the step-by-step guidance for contracts registrations at:
https://www.fsd.gov/sys_attachment.do?sys_id=b4c153341ba3c5103565ed3ce54bcbb8

You must have a UEI number in order to begin either registration process.

If you already have the necessary information on hand (see below), the online registration takes approximately one hour to complete, depending upon the size and complexity of your business or organization.

What data is needed to register in SAM?

SAM registrants are required to submit detailed information on their company in various categories. Additional, non-mandatory information is also requested. Categories of required and requested information include:

* General Information - Includes, but is not limited to, UEI number, CAGE Code, company name, Federal Tax Identification Number (TIN), location, receipts, employee numbers, and web site address.
